# Line Level & Noise Control

The Axxess premium line of line output converters (L.O.C.) allow for the installation of line level products such as amplifiers and crossovers into stereo systems that do not have pre-amp outputs. The two-channel ground loop isolators and the 3.5mm ground loop isolator are designed to eliminate ground loop noise found in RCA or 3.5mm audio lines of stereo systems with amplifiers with the cross-channel interference found in other isolators.
